

EXHIBIT D

1. (Once Amended) A garment container comprising:

a plurality of panels, at least one of said plurality of panels being a vertical side panel having a vertical side cut-out opening formed therein by cutting out a portion of at least one of said vertical side panel to form at least one cut-out opening, said plurality of panels being capable of containing at least one article of clothing therebetween; at least one self-contained closeable pocket composed of a transparent gas impermeable material for closing said cut-out opening of said vertical side panel, said self-contained closeable pocket configured to hold a chemical composition in an interior thereof;

means for providing access into the interior of the pocket;

said at least one self-contained closeable pocket having a transparent gas-impermeable front surface and a back surface, said back surface being perforated with vents disposed above a part of said surface to which a solid source for fumigant gravitates to allow vapor from the chemical composition to pass therethrough to treat the garment without a gravitation of small residue particles through said vents.
2. (Once Amended) A garment container according to claim 1, wherein said back surface of said self-contained closeable pocket is gas-impermeable.
6. (Once Amended) A garment container according to claim 1, wherein said plurality of panels form an underbed storage box.

9. (Once Amended) A garment container according to claim 1, wherein said means for providing access is arranged along one side edge of said self-contained closeable pocket.
10. (Once Amended) A garment container according to claim 1, wherein one side edge of said self-contained closeable pocket coincides with one side edge of one of the plurality of panels.
11. (Once Amended) A garment container according to claim 1, wherein two side edges of said self-contained closeable pocket coincide with two side edges of one of the plurality of panels.
12. (Once Amended) A garment container according to claim 1, wherein said self-contained closeable pocket extends completely across one of the plurality of panels.
13. (Once Amended) A garment container according to claim 1, wherein each of said plurality of panels is gas-impermeable.
19. (Once Amended) A garment container according to claim 1, wherein said means for access is a zipper.
